*Directions for the use of the following Tide-Table, sent  
by J. F. M. R. & R. S. S. to the Publisher.*

SIR,

HAVING found my two last years Tide Tables very agreeable to Experience. I here present you with another for the year ensuing made by the same Theory and Numbers. I must only desire those that use it, to note.

That when by reason of long droughts in Summer, or continual hard Frosts in Winter, the fresh Waters are low, as also when the winds blow hard at N. or N. W. the Tides may hold up longer than the times shew'd in the Table.

But when the contrary winds blow hard, or by reason of great Rains the Freshes are increased, they hold not out so long: yet have I very rarely found the difference more than half an hour.

I find by enquiry made amongst our most experienced Seamen, that the high Waters of our English and Neighbour Ports keep a good correspondence with these of the River of *Thames*; Having therefore instructed my self the best I could by conference with them, I have made the following Table of Reduction, whereby the Tide Table may be

be made to serve at the places underwritten,  
by Adding,

	<i>l. m.</i>
For <i>Tinmouth-haven, Hartlepool, and Amsterdam</i>	0 30
<i>Brest</i>	1 00
